

TECHNICAL SKILLS

- **Programming Languages:** C++, JavaScript, Python
- **Frameworks and Libraries:** Express.js, React.js
- **Technologies:** Node.js, HTML, CSS
- **Databases:** MongoDB, MySQL
- **Data Science & Machine Learning:** Supervised Learning, Unsupervised Learning
- **Data Visualization & Analysis:** Matplotlib, Seaborn (sns), Pandas, NumPy
- **Developer Tools:** Git, GitHub, VS Code
- **Core Competencies:** Data Structures, Algorithms, Problem Solving

PROJECTS

Full-Stack Real-Time Stock Trading & Monitoring Platform [Git Hub](#)

- Built a full-stack stock trading platform using **MongoDB**, **Express.js**, **React**, and **Node.js**, implementing secure **JWT-based authentication** and RESTful APIs to enable user onboarding, portfolio creation, and end-to-end stock transactions.
- Integrated real-time data visualization using **Chart.js**, designing optimized API endpoints and efficient **MongoDB** queries to ensure **low-latency** trade updates and seamless frontend-backend synchronization under concurrent user activity.

E-Commerce Customer Segmentation system [Git Hub](#)

- Developed a **Customer Segmentation System** using **Agglomerative Clustering** on **E-Commerce Data**; performed **Data Preprocessing**, **Feature Engineering**, and **Exploratory Data Analysis (EDA)** using **Python**, **Pandas**, **NumPy**, **Matplotlib**, and **Seaborn**.
- Applied **Elbow Method**, **Silhouette Score**, and **Principal Component Analysis (PCA)** using **Scikit-learn** for **Optimal Cluster Selection** and **Dimensionality Reduction**.

Wanderlust – Server-Side Rendered Rental Marketplace [Git Hub](#)

- Developed a server-side rendered rental marketplace using **Node.js**, **Express.js**, and **EJS**, enabling dynamic property listings and user interactions through structured backend-driven content generation.
- Architected the application using the **MVC (Model-View-Controller) pattern**, decoupling business logic, routing, and database operations to improve maintainability, scalability, and clean code organization.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (AI and ML) [2024-2028]

CERTIFICATIONS

- DELTA Batch (Full Stack) Apna College
- ALPHA Batch (DSA in C++) Apna College

ACHIEVEMENTS

- Winner of Inter-School Cricket Tournament & Football Tournament
