

PRINCE KHUNT

Gujarat, India | 9265068315 | princekhunt4105@gmail.com | [portfolio/prince](#) | [linkedin/prince](#) | [github/prince](#)

SKILLS

Languages: Python, JavaScript, SQL

ML & AI: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, RAG, Agentic AI, MLOps

Frameworks & Libraries: PyTorch, TensorFlow, Keras, Scikit-learn, NumPy, Pandas, LangChain, LangGraph, spaCy, FastAPI

Databases & Tools: PostgreSQL, pgvector, MongoDB, Redis, Docker, AWS, MLflow, DVC, Git, CI/CD

Miscellaneous: Data Structures & Algorithms ([LeetCode](#)), Statistics, Web Development

EXPERIENCE

AI/ML Project Tutorial Instructor (Freelance)

Mar 2026 – Apr 2026

Apna College

Remote

- Built a real-time exercise-coaching system using **computer vision** and **pose estimation**. ([Live Project](#))

AI Developer Intern

Nov 2025 – Mar 2026

Vertical Systems, Vancouver, Canada

Remote

- Developed and deployed a full-stack AI support-ticketing system that uses **Retrieval-Augmented Generation (RAG)** to automatically resolve user queries from a knowledge base. ([Live Project](#))

Web Developer Intern

Apr 2023 – Jun 2023

Rain Infotech, Surat

On-site

- Built responsive web interfaces and REST APIs with the **MERN** stack (MongoDB, Express, React, Node.js) for web applications.

PROJECTS

Wedding Event AI Image Finder [[GitHub](#)]

FastAPI, Next.js, Celery, Redis, PostgreSQL, pgvector, InsightFace

- Designed a decoupled pipeline with **FastAPI**, **Celery**, and **Redis** to run heavy face-recognition workloads asynchronously, removing redundant computation and keeping responses fast.
- Built a facial-indexing system with **InsightFace**, storing 512-D embeddings in **PostgreSQL** + **pgvector** and matching faces in milliseconds via cosine-distance search.

Ecommerce AI Support Assistant [[GitHub](#)]

Agentic RAG, LangGraph, FastAPI, pgvector, Gemini

- Built a multi-agent support chatbot with **LangGraph** (planner → executor → synthesizer) over **Gemini**, streaming reasoning, tool calls, and tokens live to a **Next.js** UI over a **WebSocket**.
- Implemented **Agentic RAG** with **SentenceTransformers** embeddings and **pgvector** cosine search, **JWT**-scoped order tools, and **Redis** short-term memory on a clean layered architecture.

Chat to Food Order [[GitHub](#)]

NLP, LangChain, MERN, Hugging Face, BERT, spaCy, NER

- Built a chat-to-order web app using **BERT** for natural-language understanding and **spaCy NER** for entity extraction, processing a complete order in **under a minute**.
- Tuned the NLP pipeline for food-item extraction to **95%+ accuracy** on real-world inputs.

Self-Drive Car [[GitHub](#)] [[Steering](#)] [[Lanes](#)] [[Detection](#)]

Computer Vision, YOLOv11, Keras

- Built three computer-vision models for **lane detection**, **object recognition**, and **steering-angle prediction**.
- Improved object-detection and road-segmentation pipelines to **90%+ accuracy**.

Insurance Prediction Pipeline [[GitHub](#)]

MLOps, AWS, Docker, Git, MongoDB

- Built an end-to-end **MLOps pipeline** from data ingestion to deployment on **AWS**, with **CI/CD** via Docker, Git and **MongoDB**.
- Built Chrome extensions [LinkedIn Chat Assistant](#) and [Gmail AI Assistant](#); additional work on [Portfolio Website](#) and [GitHub](#).

EDUCATION

Marwadi University

Rajkot, Gujarat

CGPA: 8.15, Bachelor of Science, Data Science

Jul 2023 – Feb 2026

ACHIEVEMENTS

- Smart India Hackathon 2023 Winner** (Top 1%); [Kaggle Notebook & Discussion Expert](#)

CERTIFICATIONS

Machine Learning — Coursera & NPTEL — Deep Learning (Computer Vision) — SQL — HackerRank — Generative AI, MLOps [View All](#)
