

Manish Kumar

Haryana, India | 9693692602 | Email | Portfolio | LinkedIn | GitHub

Skills

Languages: Python, JavaScript, SQL, C/C++

ML & AI: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, RAG, Agentic AI, **Frameworks & Libraries:** PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, LangChain, LangGraph, FastAPI, React.js, Express.js, Node.js, Streamlit

Databases & Tools: PostgreSQL, MongoDB, MySQL, Supabase

Developer tools: Git, GitHub, VS Code, Netlify

Miscellaneous: Data Structures & Algorithms (**Leetcode(350)++**)

Experience

Machine Learning Intern – Software Solution & Services

(Jun 2026 – Jul 2026)

During my internship at Software Solution & Services, I gained hands-on experience in Machine Learning and Artificial Intelligence. I worked on data preprocessing, model training, and evaluation using Python and Scikit-learn/PyTorch. I explored concepts such as NLP, Computer Vision, and Generative AI while developing practical AI solutions. This internship strengthened my understanding of the end-to-end machine learning workflow and real-world AI applications.

C++ & DSA Intern – RKV Solution

(Jun 2025 – Jul 2025)

During my internship at RKV Solution, I built a strong foundation in Data Structures and Algorithms using C++. I enhanced my problem-solving skills by implementing efficient algorithms and optimizing solutions based on time and space complexity.

Projects

SnapClass – AI-Powered Attendance Management System [GitHub]

(Jul 2026 – Sep 2026)

- Developed an AI-powered attendance management system that automates attendance using Face Recognition and Voice Recognition, ensuring secure, accurate, and proxy-free attendance
- Built an interactive platform where teachers can create subjects, manage attendance, and enroll students via QR codes or subject codes, while students can log in with Face ID and track their attendance in real time.
- **Tech Stack:** Python, Streamlit, FastAPI, Supabase, PyTorch, OpenCV, Librosa, Resemblyzer, NumPy, Pandas, Scikit-learn, Git, GitHub.

Real-Time AI Gym Coach Using Computer Vision & LLMs [GitHub]

(May 2026 – Jun 2026)

- Developed an AI Real Gym Coach that uses MediaPipe Pose (pose_landmarker_full.task) and OpenCV to detect body landmarks, calculate joint angles, analyze exercise form, and accurately count repetitions in real time, ensuring users perform workouts with proper technique.
- Integrated the **Groq API** with the **Llama-3.3-70B-Versatile** model to generate personalized AI-powered voice feedback based on the user's exercise performance and posture.
- **Tech Stack:** Python, OpenCV, MediaPipe, Streamlit, gTTs(Google Text-to-speech) JavaScript, HTML, CSS, Groq API, Llama-3.3-70B-Versatile, NumPy, Git, GitHub.

Education

Geeta University Panipat, CGPA: 8.88, BTech CSE (AI & ML)

(Jun 2024 – May 2028)

Achievements

- Winner of Inter-School Cricket Tournament & Football Tournament

Certifications

Alpha DSA with C++ – Apna College

Delta Web Development – Apna College

Prime Artificial Intelligence & Machine Learning – Apna College
